

Water Knowledge Exchange Hub

A water@leeds and GWP-Tanzania Partnership

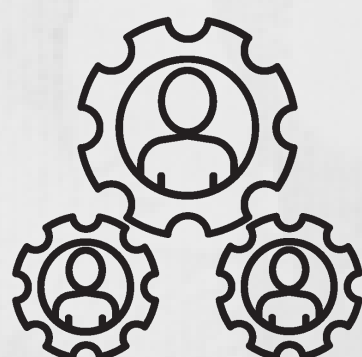

SETTING THE FOUNDATION FOR A WATER KNOWLEDGE-EXCHANGE HUB IN TANZANIA

Global Water Partnership Tanzania and water@leeds (University of Leeds) signed a MoU in 2019 to facilitate and enhance partnership in research, capacity development and knowledge management.

The Hub aims to ...

- Support the generation of robust science and analysis through research
- Distill and synthesise research outputs into targeted knowledge and information products to inform and assist decision-makers in planning future policies and action.

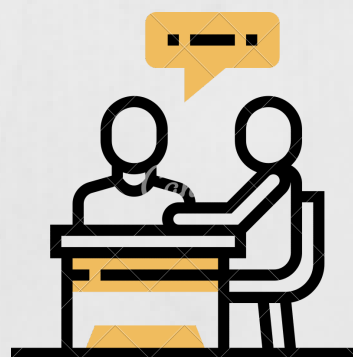

Also...

The Water Knowledge Hub will address the gap between researchers, policy-makers and practitioners on knowledge sharing, learning and interaction

TWO KEY OUTPUTS SO FAR...

OUTPUT 1: STAKEHOLDER CONSULTATION

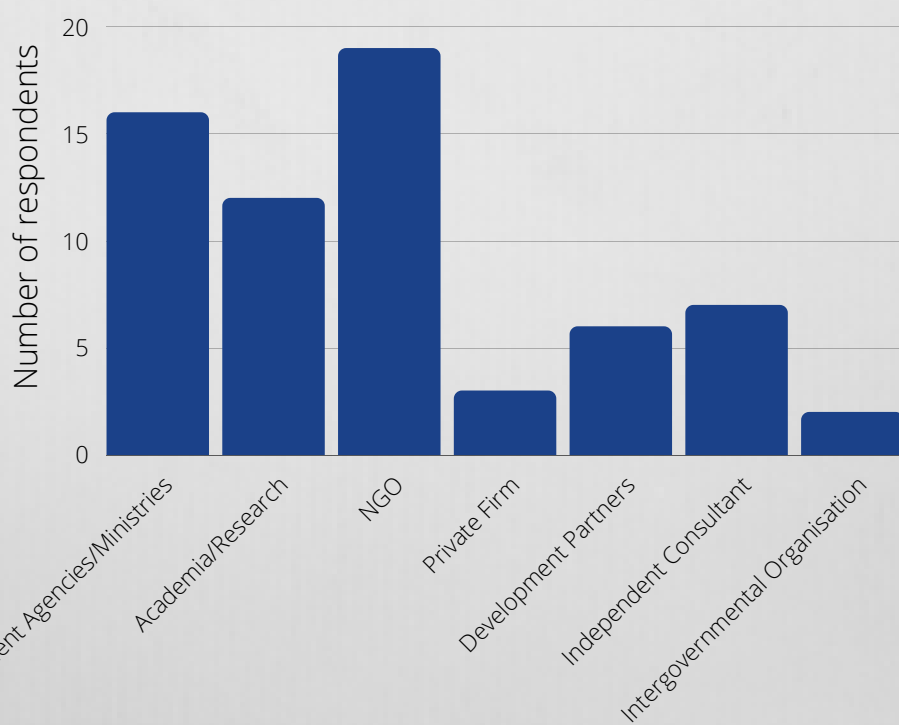

Online survey was shared with targeted stakeholders in the Southern and East African regions

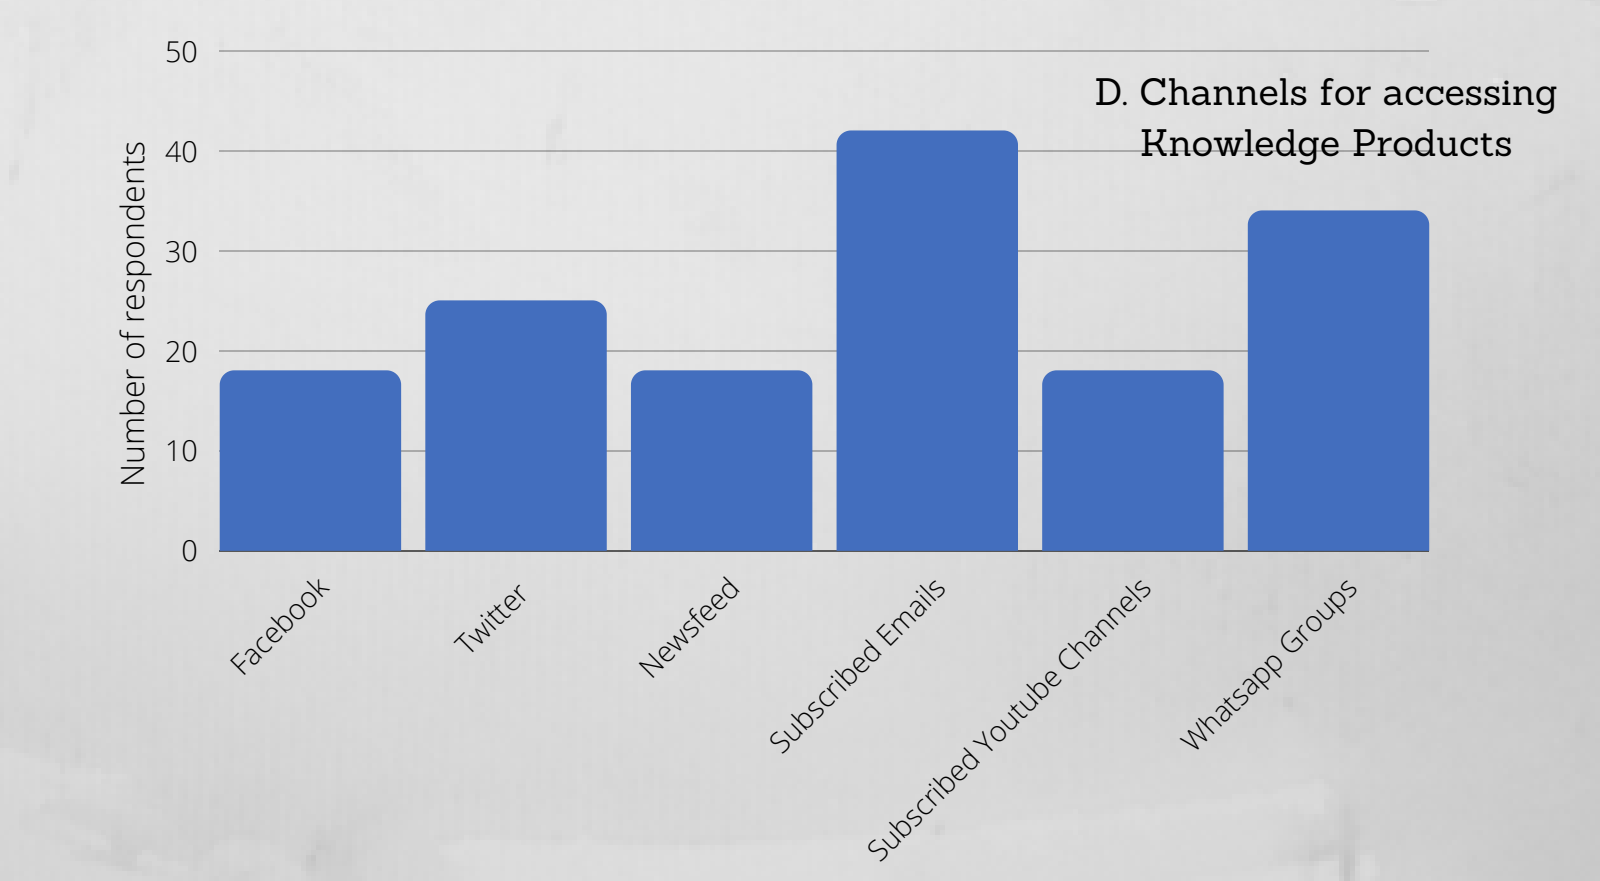

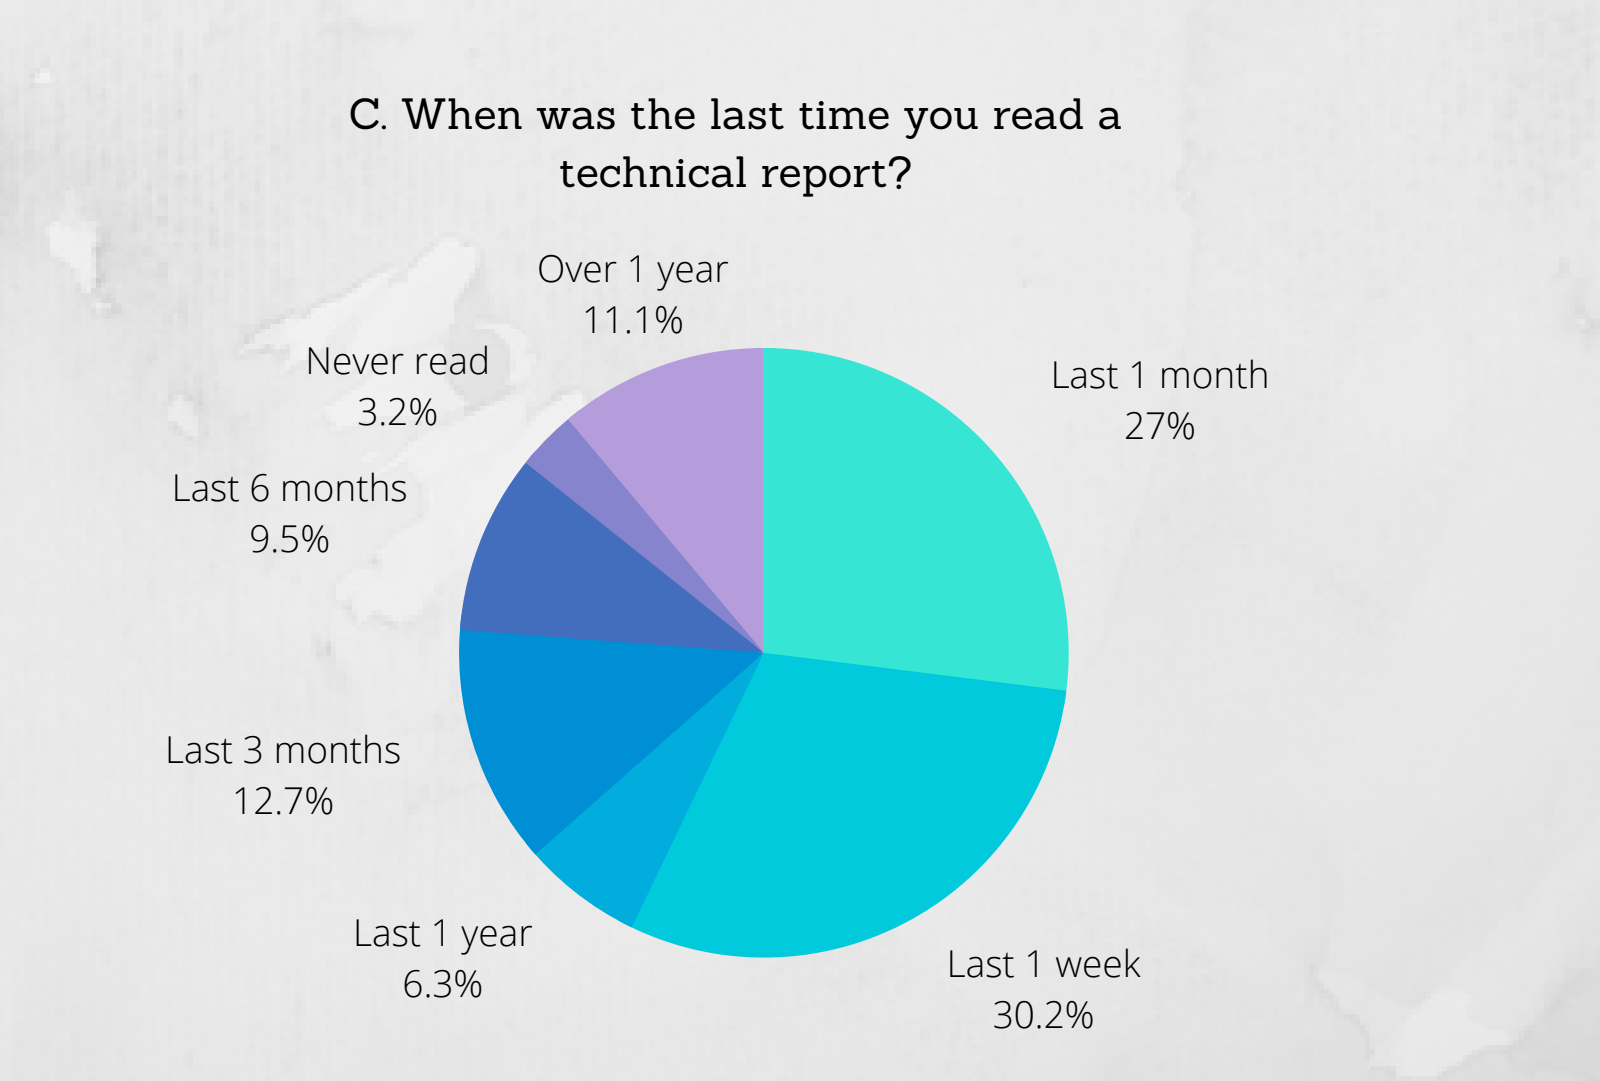

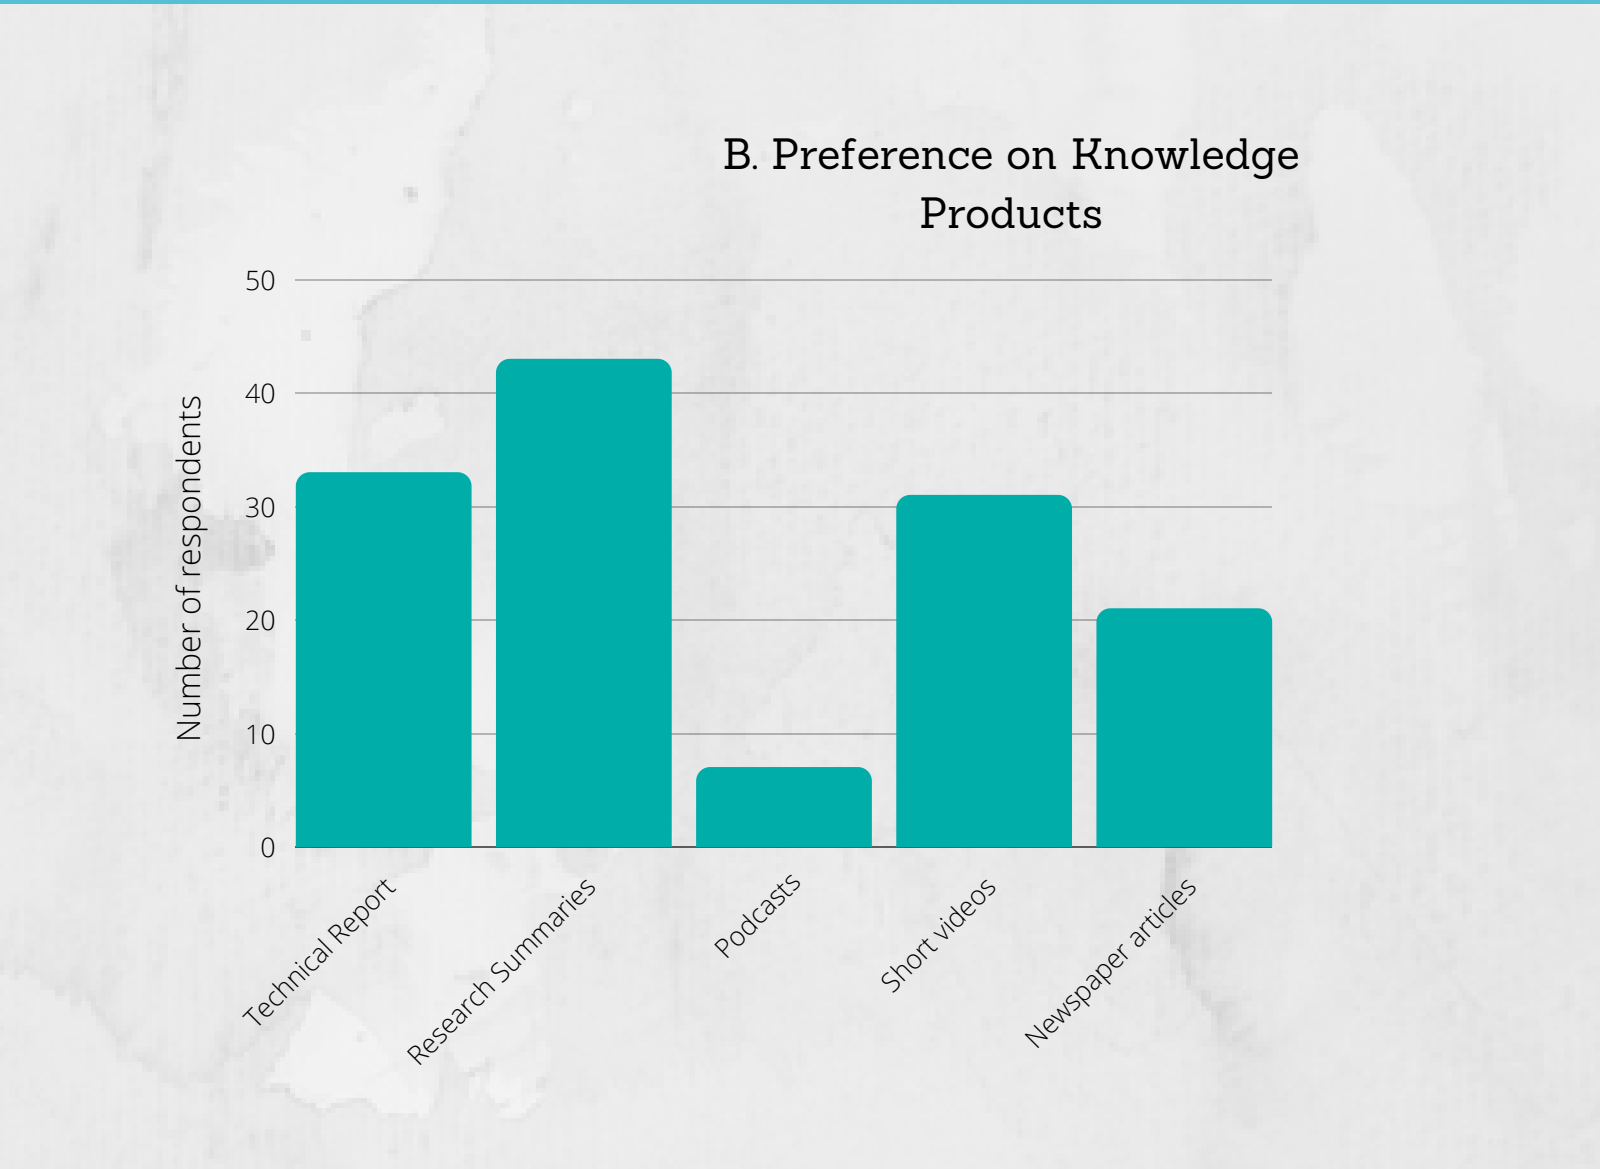

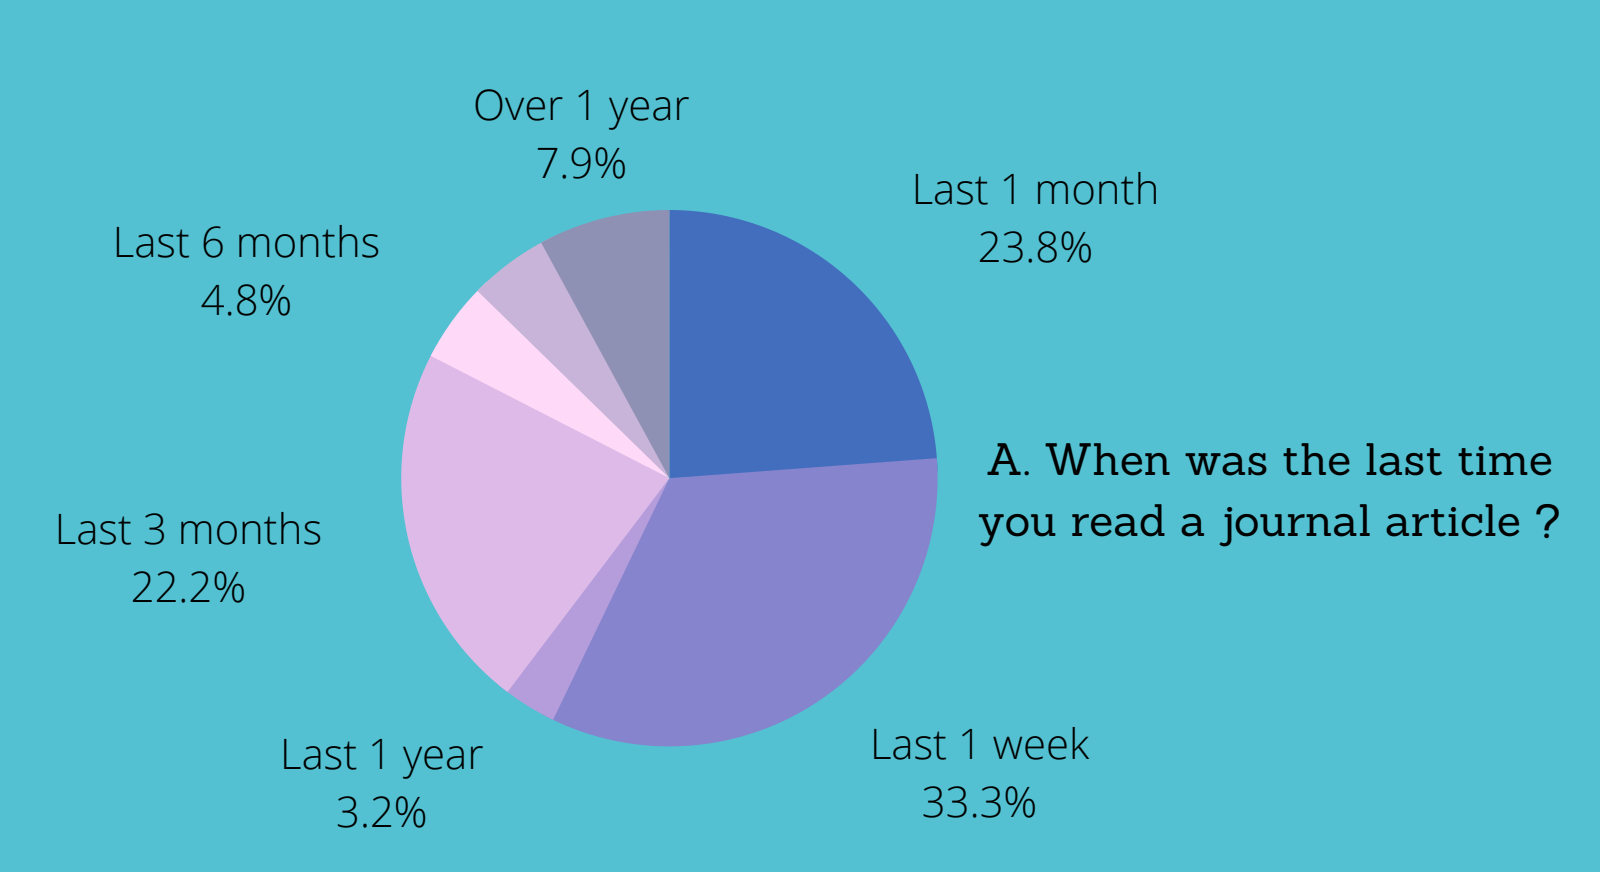

OUTPUT 2: ZOOM WEBINAR

On 14th July 2020, about 60 participants participated in a webinar, discussing the prospects of the hub in East Africa

OUTPUT 1: SURVEY RESULTS SUMMARY

E. What do you expect from the hub?

OUTPUT 2: SUMMARY OF STAKEHOLDER'S WEBINAR

a. The Hub should be able to encompass:

Moving Forward, The Hub will....

1. Test the production of targeted knowledge products under the ESCR-IAA Project

2. Mobilize partners to prepare a 5-year costed proposal for the hub
